YOUR TRUSTED PARTNERS

When it comes to finding a local partner to provide packaging solutions, choosing Integrated Packaging unlocks a world of technical expertise, leading technology and product innovation.

Integrated Packaging is the partner that supports you across the breadth of your operation - with a focus on improved results.

FLEXIBLE GROUP SOLUTIONS

integrated.

Integrated Packaging Group (IPG) is a part of Pro-Pac Packaging Group (PPG); an ASX-listed company. Merging with PPG in November 2017, IPG is a leader in the growing flexibles manufacturing and distribution segment in Australia and New Zealand.

Integrated Packaging Group comprises of three businesses. Each recognised in their respective markets as industry leaders, with the capacity to create quality solutions for customers across a wide variety of industries.

integrated. PACKAGING

Servicing diverse Australian markets since 1982, Integrated Packaging (IP) is one of Australasia's largest specialist manufacturers and distributors of stretch film and associated packaging products.

IP offer an extensive range of products and services to meet almost any packaging need. From stretch wrap and shrink film to produce bags, printed films, and PVC food films.

With an expansive distribution network and team of technical experts, IP provides a consistently high level of service to all our customers.

integrated. RECYCLING

Integrated Recycling (IR) is part of IPG and enables plastic films made by the group and recovered agricultural plastics to be recycled into the Envire range proving that waste no longer means landfill.

Integrated Recycling develops and manufactures extremely durable and high performing products made from recycled plastics for industrial, infrastructure and parkscape applications. IR's Mildura factory upcycles these resources to a tough patented material used to produce Envire furniture, boardwalks and retaining walls, Duratrack railway sleepers, Blox safety support systems and noise wall barriers.

PERFECTION PACKAGING

Perfection Packaging was established in 1978 and steadily increased its manufacturing footprint and expertise. The award-winning company joined the Pro-Pac group in Sept 2018.

Perfection Packaging provide an extensive range of flexible packaging solutions for the FMCG industry, including food, health, and personal care.

The flexible packaging specialists operate the most advanced equipment available and continually invest to maintain the quality of product and service that have won awards around the world.

WE COMMIT TO
A SUSTAINABLE FUTURE

We commit to achieve shared benefits for the communities and environment in which we operate, as well as for our vendors, customers and our operations.

Through Integrated Recycling (IR) we have closed the sustainability loop by improving economic and environmental goals simultaneously. IR enables plastic films made by the Integrated Packaging Group to be upcycled and developed into innovative second life range of products.

We have proudly partnered with REDcycle™ to support the recovery and reuse of post-consumer soft plastic. This collaborative effort provides consumers a widely available, sustainable disposal option for their soft plastic packaging.

We are members of Plastics and Chemicals Industries Association (PACIA) and a Sedex member (supplier ethical data exchange).

We are signatory members to the Australian Packaging Covenant (APCO). APCO is a non-for-profit organisation leading the development of a circular economy for packaging in Australia.

Our measures in place to reduce our environmental impact include reclaiming resin, trim and solvents which are then reused or recycled. We have installed RTO units which convert CO^2 to energy for more sustainable reuse.

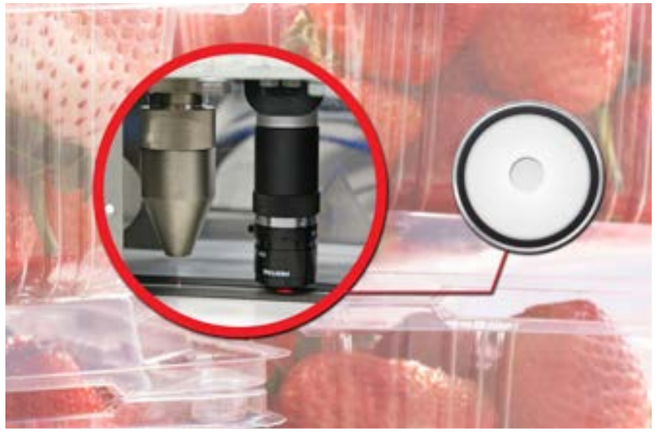
WASTE NO LONGER
MEANS LANDFILL

"A simple idea of taking grape vine covers and turning them into vine posts has grown into IR's Envire® range that includes outdoor furniture, boardwalks, retaining walls, fencing and specialty structural products"

The Envire® range has a design life of 40 years and will save trees, use less energy than products manufactured from steel or concrete and diverts waste from landfill. The Envire range is non-toxic, doesn't leach, is resistant to termites, fungal rot, water and the sun.

IR's Duratrack sleeper is a sustainable innovation that outperforms traditional timber sleepers, uses waste plastic that would otherwise go to landfill and saves our natural timber resources. Duratrack sleepers have a life cycle about 3-4 times longer than timber and results in lower maintenance costs.



INVESTED IN INNOVATION

Today's consumers shop with tomorrow in mind. With this understanding we continuously innovate for a more sustainable future.

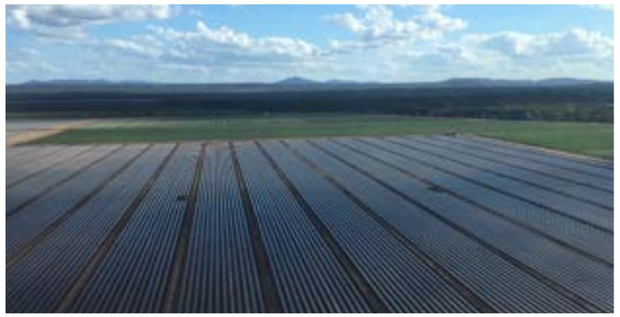
Our innovations all have our customer at the heart. This ensures our efforts produce valuable solutions to problems worth solving. We strive to actively collaborate through generously sharing learnings, resources, and expertise. We engage and consult all stakeholders, internal and external, to produce the best results. We're always exploring ways to innovate and keep our customers ahead of the competition – whether it's optimised load containment or developing entirely new packaging solutions.

Innovation is critical for the future of our organisation and the industry. Integrated Packaging has taken a proactive approach and invested significantly in innovation and innovative technology. Innovation and sustainability are part of our core values as we continue to forge a path to a true circular economy; a world where waste is minimised and finite resources are recovered and put into new productive purposes.

WE ARE THE
LOCAL EXPERTS

We are the local packaging solutions specialists and understand that packaging is about more than protection. Your products need to be shipped safely, but they also need to look good and represent your brand well on the retail shelf.

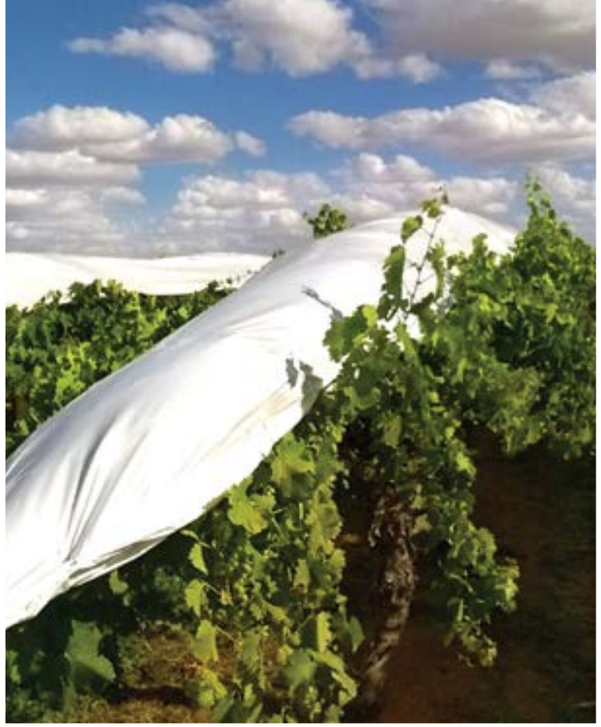
Integrated Packaging provides solutions for multiple markets through its broad manufacturing footprint across Melbourne, Sydney, Adelaide, Perth and Auckland. This broad product offering and global distribution reach establishes IPG as a one-stop centre for all business packaging requirements.



AGRICULTURE

Integrated Packaging has a comprehensive range of flexible films with superior processing properties that guarantee optimal product protection and convenience for transport, storage and handling. With a multitude of features and high quality print options, Integrated Packaging can fulfil the individual requirements of specific agricultural products and applications.

We also have the capability to design and manufacture a range of products for all types of packaging lines. We are continually improving performance for the benefit of our customers and for a better environment.



FOOD & BEVERAGE

With almost 40 years of experience, Integrated Packaging and Perfection Packaging provide a comprehensive end-to-end range of primary, secondary and tertiary packaging solutions.

Our range of packaging solutions span a variety of products in the food and beverage category, including salty snacks, snack bars, confectionery, dry foods, fresh produce, personal care/wipes, barrier chiller products, barrier bread products, medical instruments, dairy/ice creams and pet food.

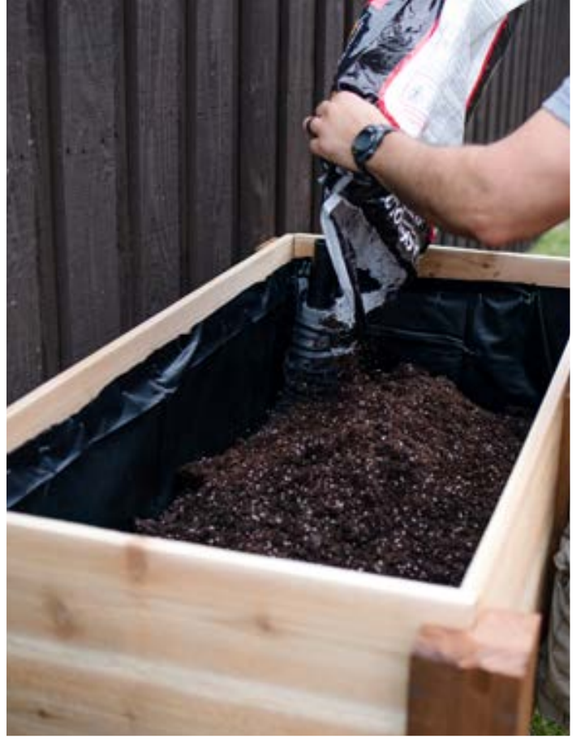
We utilise the most advanced equipment available and continually invest to maintain the highest quality of product, process efficiency and the superior service that we are renowned for. Our products meet the highest quality and hygiene standards and we are certified with both HACCP food safety program and FSSC 22000 food safety management.

HORTICULTURE
(LAWN & GARDEN)

Integrated Packaging is Australia and New Zealand's leading manufacturer of lawn and garden flexible packaging. Our range has been designed with the unique and varied requirements of the horticultural industries in mind.

We supply a superior range of pre stretch film for mulch, pesticides and fertiliser. Our packaging solutions are designed for improved sealing, operating issues and to avoid any failure of the packaging.

Integrated Packaging have been supplying quality mulch film for over three decades with a strong team on the ground around the country.



INDUSTRIAL

Packaging solutions is not a one-size-fits-all industry. At Integrated Packaging our experience stretches across 3,500 unique products. From available off-the-shelf products to engineered solutions, we're able to find, test and create exactly what our clients need.

Sometimes only a custom packaging solution is suitable for the job at hand. If that's the case, then we have your flexible packaging needs covered. Whether the working environment of the film is humid, dry, dusty, hot, wet or cold, Integrated Packaging can develop a product to suit your needs.

We're confident our diverse range of packaging solutions and technical experts can fulfil customers' industrial packaging requirements.

PRODUCE

Integrated Packaging provides quality, innovative solutions for your fresh produce packaging needs. We have an established reputation of working with small and large scale supermarkets and retail stores. Our packaging experts understand the importance of amplifying your brand's visibility in the market, and will work together with you to best position your product.

We focus on developing packaging that ensures the safe transit and storage of your products. IP supplies value added packaging products that help protect, trace and market fresh produce for consumers all over Australia with minimal waste.

CUSTOMER SERVICE AND LOCAL TECHNICAL EXPERTS

Our approach focuses on delivering a more customer centric experience. We provide an experienced and dedicated sales team and support staff in every state, major city, and region in Australia and New Zealand.

Integrated Packaging takes pride in its ability to offer solutions across multiple industries. With a vast distribution network and a well formed team of trained field agents and support staff, Integrated Packaging Group provides a level of service that's consistently high and equally accessible to all our customers.

Our category management focus provides our customers a specialised service, improved quality, greater savings, and an increased focus on collaboration and innovation.

We have further improved and upgraded our operations with integrated systems which offers greater visibility and responsiveness to customers.

A consistently high level of support and customer service

OUR AUSTRALASIAN FOOTPRINT

STREAMLINED, RELIABLE OPERATIONS

Leading capability, world-class technology and specialised expertise delivered to you through our manufacturing Centres of Excellence.

PE FILM EXTRUSION

Flexible film solutions for multiple markets enabled by an expansive fleet of co-extrusion lines, spread across a broad manufacturing footprint.

PVC FILM EXTRUSION

Manufacturing a comprehensive range of PVC film products, with customised attributes to enhance the benefits of PVC packaging in fresh food and produce

'SOFT FILM' PRINT AND CONVERSION

Specialist equipment, systems and processes centred around the production of high-quality flexographic printing of PE film products for customers.

'HARD FILM' PRINT AND CONVERSION

Demonstrated pristine skill and expertise of Perfection Packaging has led the Group to invest to make this the epicentre for all BOPP and PET flexographic printing.

Integrated Packaging provide excellent customer service, consistently exceed DIFOT and quality targets and have strong technical support available to support our brewery network.

Lion is committed to improving the sustainability of our packaging, in 2019 Integrated Packaging partnered with Lion to downgauge our shrink film, removing over 40 tonnes of plastic from our supply chain. The commitment shown from Integrated Packaging in the delivery of this project demonstrates the strong partnership that exists between our organisations

Lion Dairy & Drinks

LION

Integrated Packaging have been the major supplier to Zerella Fresh for the past 25+ years, for all our flexible packaging in carrots & potatoes.

They have played a very important part in keeping up with our ever-increasing demand in service, quality & innovation, thus ensuring that our main retail & wholesale customer needs are always met.

This long-standing relationship between both parties has been mutually successful, and I would have no hesitation in recommending Integrated Packaging as a flexible packaging supplier.

Zerella Fresh

Zerella FRESH

Lite n' Easy

IPG has been an important supplier to Mitchells Quality Foods – Lite N Easy, supplying different types of Flexible Packaging.

Communication is of a very high standard and deliveries are met on time which is a key component for our business. The high standards and product innovation that IPG display has been of great benefit to our company.

Lite N Easy

KOALA FARMS

Integrated Packaging have supplied our company, with our plastic film products, for the past 5 years. We have always found the quality of their products to be of a high standard.

We have been working with them to deliver a 20um film product to the market, which will deliver significant reductions in plastic and cost. I would recommend the team at Integrated Packaging to any other company wishing to purchase their plastic products from them.

Koala Farms

SAFETY AND
QUALITY CONTROL

Integrated Packaging believes that the success of any business depends on the supply of high-quality products and services that exceed customer and consumer expectations.

Integrated Packaging is certified with both HACCP food safety program (Hazard Analysis and Critical Control Points) and IS090001 Quality Management Systems. We stringently maintain the processes and accreditation required to ensure the quality needs of the customers we supply in the food, beverage, fresh produce and FMCG markets.

All Manufacturing processes are monitored and recorded for traceability and consistency of product ensuring all product is manufactured within defined tolerances to ensure precise specifications are met.
